Mechanical/Structural Testing

*Your
Source for
Test and
Analysis*

TENSION, COMPRESSION, FATIGUE, VIBRATION OR SHOCK

Standard tests or custom set-ups, it makes no difference. MTL has 3 vibration systems, 3 fatigue systems, 3 tensile systems and a structural load frame to assure we can perform your test program right away and on time. Our largest vibration system is rated at 18,000 lbs force. Our largest tensile system is rated for 300,000 lbs load. Mechanical testing can be performed from 1000° C down to Liquid He temperatures. Bring us your test requirements and see what we can do for you.

WE CAN HELP

**MARTIN TESTING
LABORATORIES**

4724 Arnold Ave.
McClellan, CA 95652
